

**LARGE RARE ANTIQUE TRACTOR AND EQUIPMENT AUCTION
SEPTEMBER 22 & 23, 2017 9:00 AM MT BOTH DAYS
NORTHEAST MONTANA THRESHERS AND ANTIQUE ASSOCIATION
CULBERTSON, MONTANA**

Auction Site: The auction will be held at the Northeast Montana Threshers and Antique Association Show Grounds one mile south of Culbertson on Hwy 16.

Auctioneer's Comment: The Northeast Montana Threshers and Antique Association have been active for over 50 years and have held one of the biggest shows around every year. The Association has some of the rarest tractors and implements known to exist. All of these have been used in their show each year and have been maintained and well taken care of. THIS IS AN AUCTION YOU DON'T WANT TO MISS! MAKE PLANS NOW TO ATTEND!

The Northeast Montana Threshers and Antique Association intend to utilize the funds raised from the auction to provide scholarship opportunities.

John Deere B, 53641, 1938

John Deere D, 34575, 1925, This tractor was never used for field work. It was built Sept 2, 1925 and shipped to the John Deere branch house in Winnipeg, Canada. It was used at the branch for moving machinery and other related goods in the yard. In the early sixties, the Winnipeg Brand President purchased the tractor from the company and took it to his 20 acre farm north of Winnipeg. John Kehler had become friends with the President and an agreement was made. Should the tractor become available, Kehler would have first option to purchase the D, which He did. Mr. Kehler passed away in 1980. It was decided by the family too put the D up for Sale. Anthony and Sharon Otto purchased it and completely restored it to new condition.

CASE 1912 80 HP STEAM ENGINE
CONTACT MERLIN CROHN – 701-770-3392

This is an early 80 HP Case. Approximately 9 of these engines were made. It is a transition Engine between the 75 and the later 80.

New main bearing poured and a new pinion on the crank shaft, approximately 25 years ago.

New tubes in the feed water heat exchanger, approximately 20 years ago

Marsh pump rebuilt and installed on engine, approximately 15 years ago

New flues and replaced several stay bolts, approximately 10 years ago

Has had very little use since any of this work was done.

Has good working Marsh pump and injector to supply feed water

Non original bunkers, but serve the purpose well

One broken spoke in flywheel that was drilled and bolted at the time of the pinion replacement

There is a bulge between the fire box door and the draft door that will need attention. The bulge has been there since the engine was first brought to Culbertson and has not worsened, but ultrasound tests showed it thinner there. Last time it was licensed it was at about 73 PSI. Before that it was ran at 135 PSI. Past estimates to fix the bulged area were between \$5,000 and \$10,000. We make no guarantees, so your UT should be your guide. Has been stored inside dry since last use about 8 years ago. It is a very Nice running engine.
